

DIRECT LINK[®]

Help At The
Touch Of A ButtonSM

Medical Alert Systems

***The first critical moments of an emergency can be the most terrifying...
With our medical alert systems, you can live worry-free
knowing that help is always with you.***

How Does a Medical Alert System Work?

Direct Link's line of senior independence products easily enables those at-risk persons to remain in their own homes longer. With just the touch of their personal help button, clients will be put contact with our Care Center. Monitored 24 hours a day, 365 days a year, our friendly Care Center staff will respond promptly and take action based on your prior instructions. They will:

No Worrying About:

- Falls
- Personal Safety
- Medical Emergencies
- Being Alone

- Dispatch an ambulance when necessary
- Have a neighbor check in on you
- Notify a family member of your situation

For added security, Direct Link includes an extra emergency call button free of charge. All call buttons are water-resistant, making them ideal for all rooms – even kitchens and bathrooms.

When Should Direct Link be Considered?

According to the American Geriatrics Society, one-third of all people ages 65+ will fall each year. Getting help within that first hour following an incident is critical in their independence. You and your loved one could benefit from Direct Link products if they experience any of the following:

- Is alone several hours a day
- Has fallen or visited the emergency room in the past year
- Has a chronic ailment, such as heart disease or stroke
- Uses a cane, walker, or other device to help with balance and walking
- Requires assistance with activities of daily living
